

San Diego Junior Doubles League

To Who It May Concern

Working with Sabina Islam was a great experience for me as she not only displayed high professionalism, but it was obvious she cared about my website and its success by the amount of work and detail she put it into it. From the start, she was upfront with the complexity and the costs involved. Because this was not an easy project, she first had to put a lot of thought into it by putting together a technical documentation based on my needs with a timeline of milestones and deliverables. She communicated the progress well by answering all of my questions on an item-by-item basis, continually kept me updated with lengthy phone calls and detailed emails. Her team went above and beyond by putting together an algorithm for my doubles tennis league that automated member registration, pairing up of doubles teams, submission of match results, generating a season standing, and depositing it all in a history page of all matches played by each member. I told her my vision and she put all the moving parts together in a cohesive, user friendly website that members will keep going back to again and again. Her team even provide me an instructional video of how to manage the website as the administrator and has guaranteed me support for a full month after the project's completion. My website (sandiegojdl.com - San Diego Junior Doubles League) is now something I can be proud to show to my members and future sponsors. I will definitely go back to her for my next project!

Highly recommended.
